EXPORTING YOUR SEQUENCE

We accept both OMF and AAF for audio sequences.

STEPS:

- Remove video tracks to create an audio only sequence.

- Provide a 1KHz 2-pop exactly 2 seconds before the first picture frame.

- Provide 48KHz, 16bit or 24bit WAV files audio with 1000 frame handles.

Please make every effort to label dialogue tracks in the following manner:
  - Lav mic <character>
  - shotgun mic <character>
  - room mic
  - duplicate lav/boom/room

Please attempt to keep the same mic type on the same track throughout as opposed to having clips of one type mixed with clips of another type. This will save an enormous amount of time in the mix/sound design process. If you have any questions about this, please don't hesitate to ask us!
